---

**Superfast before end of 2021**

You are getting a broadband upgrade funded by the Scottish Government before the end of 2021. No action on your behalf required.

**Superfast after end of 2021**

You are getting a broadband upgrade funded by the Scottish Government after the end of 2021. You may be eligible for a “one off” £400 voucher. But are not eligible for the UK Government Gigabit Broadband Voucher Scheme.

**Commercially planned**

The Scottish Government has been informed that there are commercial plans in place to upgrade your property. If this has not happened by July 2021 you may be eligible for a “one off” £400 voucher.

**No state or commercial plans**

There are no government or commercial plans to upgrade your broadband. You may be eligible for a “one off” £5,000 voucher. You may also be able to combine this with a UK Government Gigabit Broadband Voucher Scheme voucher as part of a group scheme.

**Commercially connected**

The Scottish Government has been informed that a superfast connection has been built to your property. Carry out a speedtest using tools from your Internet Service Provider or the Ofcom [speedtest](#). Obtain written confirmation of your “minimum guaranteed speed” from your ISP. If this is less than 30 Mbps, then submit an R100 enquiry to have your status and voucher eligibility reviewed. If the review confirms that you cannot get a superfast service, you will become eligible for an SBVS main voucher.

### Scottish Broadband Voucher Scheme - interim connection

Contact providers that are registered to deliver connectivity solutions under the Scottish Broadband Voucher Scheme. Providers must apply for funding on your behalf by 31st December 2021.

### Scottish Broadband Voucher Scheme - main voucher

Contact providers that are registered to deliver connectivity solutions under the Scottish Broadband Voucher Scheme or the UK Government Gigabit Broadband Voucher Scheme.
